

Task Overview

The candidate must build and deploy:

1. **Two Single-Page Landing Pages** for any **two private universities**.
 2. A **lead form** integrated with a simple **Pipedream API workflow**.
 3. A basic set of **working APIs** returning simple and nested JSONs.
 4. All pages must be **mobile & desktop responsive** and **live with SSL** on any free hosting platform.
-

Detailed Requirements

Landing Pages (LP-1 & LP-2)

- Each page should contain:
 - University information (Overview, Courses, Fees, Placements, Facilities, etc.)
 - CTAs: “Check Course-wise Fees”, “Download Brochure”, “Apply Now”
 - Lead Form Fields:
 - Full Name
 - Email
 - Phone Number (10-digit, India)
 - State
 - Course Interested
 - Intake Year
 - Consent Checkbox
- **Behavior:**
 - On submit → Post data to your Pipedream endpoint.

- Show success/error message without page refresh.
- **Responsive Design:** Must work seamlessly on **mobile** and **desktop**.
- **Modal:** Clicking “Check Course-wise Fees” should open a modal with dynamic fee range from JSON/API.

Submission Format

- Landing Page URL
- Drive Link of Folder
